

Scheme: Todmorden DAZ

Objective: Construction of 3nr new Yorkshire Water consented storm overflows (CSO) Thomas Street, Cragg Road, and Eastwood

Client: ETM4

Completion: July 2009

Case Study

- Awarded 5 star health and safety award from ETM
- Winner of the CECA Civil Engineering Contract of the Year Award for schemes under £3million, April 2010

"This award recognised that the work required innovative design and planning as the work areas were located in confined and remote locations. This required meticulous planning in operations. Teamwork was central in managing project constraints. The project was typified by early stakeholder consultation and minimum disruption to communities"

"The project is particularly noteworthy for innovation in design, materials and operations and in using this innovation to reduce safety, health and environmental risk"
